We offer a wide range of primary and acute care pediatric services for kids, in a parent-supportive, child-friendly environment.

As your community hospital, West Boca Medical Center is here to help. Dealing with an injury, disease or disorder in a child sometimes requires a different approach. Our health care professionals have experience in treating a wide range of illnesses and injuries affecting children. Our medical staff has more than 100 affiliated pediatric specialists and subspecialists with expertise in many areas. Together, we support parents while we give children the highly specialized medical care they need to flourish.

// New //

Our pediatric department is further enhanced by pediatric hospitalists and pediatric anesthesiologists. A pediatric hospitalist is a board certified physician who concentrates and specializes in caring for pediatric patients in the hospital setting. If your child has an illness, injury, or disease that requires surgery or a procedure, a pediatric anesthesiologist has the experience and qualifications to assist in the treatment and to help ensure that your child undergoes that treatment safely. These pediatric enhancements can provide patients a peace of mind knowing their child will be cared for by pediatric specialists during their stay.

// Pediatric services //

- Our Pediatric Intensive Care Unit (PICU) is a special part of our hospital designed to give the sickest children the highest level of care. Led by pediatric intensivists and critical care nurses.

- Our Pediatric ER treats newborns up to children 18 years of age. It has its own ER and a separate waiting area just for kids while being treated by pediatric emergency specialists.

- Our Outpatient Pediatric Therapy Center strives to provide the right therapies at the right time to help make a difference in your child’s life. We offer physical therapy, occupational therapy, speech and language therapy and feeding therapy.

- Our Sleep Diagnostic Center helps infants and children get a good night’s sleep that is vital to their health and well-being.

- Our Level III Neonatal Intensive Care Unit can provide the most extensive services to premature and at-risk babies. In-house neonatologist staffed 24/7.

- Our General Pediatric Services Unit consists of a highly experienced team of physicians and nurses who care for pediatric patients. Their skill in treating a range of childhood illnesses and diseases is equally matched by their compassion and understanding.

For a referral to a pediatric specialist, please call 866-904-9262.
